

## SAVE 10% on all GOframes

Starts 1st January Ends 31st March 2019

### GOframe Pro Bars

create a canva with a 1.5" deep edge and twice the thickness of the standard system. (below)

These bars really give your canvas substance utilising high quality adhesive tape that negates the need for canvas pliers. You can have a wall ready canvas in less than five minutes.

Code	Size	N.A.S	SALE N.A.S

### GOframe

These bars provide an edge depth of 1.5" and 10mm thick.

All GOframe bars come with adhesive strips on them making the use of staple guns obsolete. Simply remove the adhesive line, insert your bars into the corner pieces and position your image. Remove the corner kit and trim excess canvas, pull the bars up to create the canvas edge and secure the corners with the included pins. finish by snapping the corner tabs into place for drum like tension.
